DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitation "wherein the polarizing film contacts the color filter and black matrix" (in claims 5, 7, 8, 10-13) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 1 and 3 are objected to because of the following informalities:

Claim 1: line 11: "herein" should have been "wherein"

Claim 3: line 11: "herein" should have been "wherein"

line 12: "he data line" should have been "the data line"

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 5, 7, 8 and 10-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

New matters have been raised in claims 5, 7, 8 and 10-14 as following:

Claims 5, 7, 8, 10 and 11:

- wherein the polarizing film contacts the color filter and black matrix

Claims 12-14:

- wherein the polarizing film contacts at least one of a passivation layer on the thin film transistor substrate and the black matrix of the color filter substrate

There is no description of "the polarizing film contacts the black matrix" in the specification.

Allowable Subject Matter

Claims 1-4 are allowed since there is no prior art of record that teaches or suggests a liquid crystal display and a method of making thereof comprising a relationship of various elements as claimed with the specific allowable subject matter cited in the following claims:

- a passivation film formed on the transparent insulating substrate including the source and drain electrodes and the data lines
- a polarizing film formed on the passivation film
- a pixel electrode formed on at least the polarizing film, wherein the polarizing film and the pixel electrode extend completely over the data line, and the polarizing film contacts the passivation film

Response to Arguments

Applicant's arguments with respect to claims 5, 7, 8 and 10-14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
